Effects of Using Earphones...

If you listed the benefits of earphones, you could probably go on and on. You can use them to listen to music while working out, doing chores or even while waiting for an impossibly long bus ride to be over. However, no matter how awesome or beneficial earphones may seem, they still have their downside.

One of the most serious side effects of using earphones while listening to loud music is **hearing loss**. People who listen to music at volumes exceeding 90 decibels, can suffer temporary loss of hearing. Sounds in this range can eventually cause permanent hearing loss, especially to teenagers who wear their earphones for long periods of time.

Regular usage of earphones also enhances the growth of **bacteria** in the ears 10 times more.

Tips and warnings:

- Limit the usage of earphones
- Take 5 minute breaks every hour
- Don't share earphones
- Don't use earphones that are directly inserted into your ear canals because this increases the chances of hearing loss.

What's The Issue...?

Program Fee Increase...

Effective January 1, 2018, the program fee for the After School Resource Program will be \$60 per child per week (\$50 per child per week for TMSA and CHCS).

This change in the program fee will allow Kreative Kidz to continue offering the quality of service that you've become accustomed to and trust.

We look forward to a long-standing relationship in the coming years with each of our families.

Thank you all for your continued loyalty and support!
